Claims 1-72 were pending; claims 63-72 are withdrawn with this amend

1. (Previously submitted) A method of managing securities market information, comprising the steps of:

- (a) electronically receiving over a computer network data including confidential information regarding securities market participants;
- (b) electronically storing said received data regarding securities market participants;
- (c) electronically receiving information from a first securities market participant's computer;
- (d) electronically storing said information received from said first securities market participant's computer;
- (e) producing a targeted dissemination list of securities market participants based on said stored data regarding securities market participants and said information received from said first securities market participant's computer; and
- (f) electronically transmitting to the securities market participants on said targeted dissemination list data based on said information received from said first securities market participant's computer.

2. (Previously submitted) The method of claim 1 wherein said information received from said first securities market participant's computer includes a trading interest.

3. (Original) The method of claim 2 wherein said trading interest is a certified trading interest.

4. (Original) The method of claim 2 further comprising the step of certifying said trading interest.

5. (Previously submitted) The method of claim 1 wherein said information received from said first securities market participant's computer includes specific dissemination parameters.

6. (Original) The method of claim 5 wherein said specific dissemination parameters include certified trading interest requirements.

7. (Previously submitted) The method of claim 2 wherein said confidential information regarding securities market participants includes trading interests.

8. (Original) The method of claim 7 wherein said trading interests are certified trading interests.

9. (Previously submitted) The method of claim 2 wherein said confidential information regarding securities market participants includes information regarding investment holdings.

10. (Previously submitted) The method of claim 2 further comprising the steps of:

electronically receiving data from securities market participants on said targeted dissemination list; electronically storing said received data from securities market participants on said targeted dissemination list; and

electronically transmitting information back to the first securities market participant's computer based on said stored data received from securities market participants on said targeted dissemination list.

11. (Previously submitted) The method of claim 10 further comprising the step of electronically transmitting information based on said stored data received from securities market participants on said targeted dissemination list to one or more other securities market participants.

12. (Previously submitted) The method of claim 10 wherein said information transmitted back to the first securities market participant's computer includes an interest in negotiation.

13. (Previously submitted) The method of claim 3 further comprising the steps of:

electronically receiving data from securities market participants on said targeted dissemination list; electronically storing said received data from securities market participants on said targeted dissemination list; and

electronically transmitting information back to the first securities market participant's computer based on said stored data received from securities market participants on said targeted dissemination list.

14. (Previously submitted) The method of claim 13, wherein said information electronically transmitted back to the first securities market participant's computer comprises an order.

15. (Previously submitted) A computer program for managing securities market information comprising:

(a) software for electronically receiving data including confidential information regarding securities market participants;

(b) software for electronically storing said received data regarding securities market participants;

(c) software for electronically receiving information from a first securities market participant's computer;

(d) software for electronically storing said information received from said first securities market participant's computer;

(e) software for producing a targeted dissemination list of securities market participants based on said stored data regarding securities market participants and said information received from said first securities market participant's computer; and

(f) software for electronically transmitting to the securities market participants on said targeted dissemination list data based on said information received from said first securities market participant's computer.

16. (Previously submitted) The program of claim 15 wherein said information received from said first securities market participant's computer includes a trading interest.

17. (Original) The program of claim 16 wherein said trading interest is a certified trading interest.

18. (Original) The program of claim 16 further comprising software for certifying said trading interest.

19. (Previously submitted) The program of claim 15 wherein said information received from said first securities market participant's computer includes specific dissemination parameters.

20. (Original) The program of claim 19 wherein said specific dissemination parameters include certified trading interest requirements.

21. (Previously submitted) The program of claim 15 wherein said confidential information regarding securities market participants includes trading interests.

22. (Original) The program of claim 21 wherein said trading interests are certified trading interests.

23. (Previously submitted) The program of claim 15 wherein said confidential information regarding securities market participants includes information regarding investment holdings.

24. (Previously submitted) The program of claim 15 further comprising software for:

(a) electronically receiving data from securities market participants on said targeted dissemination list;

(b) electronically storing said received data from securities market participants on said targeted dissemination list; and

(c) electronically transmitting information back to the first securities market participant's computer based on said stored data received from securities market participants on said targeted dissemination list.

25. (Previously submitted) The program of claim 24 further comprising software for electronically transmitting information based on said stored data received from securities market participants on said targeted dissemination list to one or more other securities market participants.

26. (Previously submitted) The program of claim 24 wherein said information transmitted back to the first securities market participant's computer includes an interest in negotiation.

27. (Previously submitted) The program of claim 17 further comprising software for:

electronically receiving data from securities market participants on said targeted dissemination list; electronically storing said received data from securities market participants on said targeted dissemination list; and

electronically transmitting information back to the first securities market participant's computer based on said stored data received from securities market participants on said targeted dissemination list.

28. (Previously submitted) The program of claim 27, wherein said information electronically transmitted back to the first securities market participant's computer comprises an order.

29. (Previously submitted) A method of effecting a targeted auction, comprising the steps of:

(a) electronically receiving data including confidential information regarding securities market participants;

(b) electronically storing said received data regarding securities market participants;

(c) electronically receiving information including a first order from a first securities market participant's computer;

(d) electronically storing said information received from said first securities market participant's computer;

(e) producing a targeted dissemination list of securities market participants based on said stored data regarding securities market participants and said information received from said first securities market participant's computer;

(f) electronically transmitting to the securities market participants on said targeted dissemination list data based on said information received from said first securities market participant's computer;

(g) electronically receiving subsequent orders from securities market participants in response to said transmitted data;

(h) conducting an electronic auction among orders including said orders received in response to said transmitted data; and

(i) electronically transmitting the status of orders to the respective securities market participants who initiated them.

30. (Previously submitted) The method of claim 29 wherein said information from said first securities market participant's computer includes auction parameters.

31. (Previously submitted) The method of claim 29 wherein said information received from said first securities market participant's computer includes specific dissemination parameters.

32. (Original) The method of claim 31 wherein said specific dissemination parameters include certified trading interest requirements.

33. (Previously submitted) The method of claim 29 wherein said confidential information regarding securities market participants includes trading interests.

34. (Original) The method of claim 33 wherein said trading interests are certified trading interests.

35. (Previously submitted) The method of claim 29 wherein said confidential information regarding securities market participants includes information regarding investment holdings.

36. (Original) The method of claim 29 wherein rules governing said electronic auction grant to said first order execution priority over said subsequent orders.

37. (Original) The method of claim 29 wherein rules governing said electronic auction prevent the matching of said subsequent orders and an order other than said first order until said first order is canceled or filled.

38. (Previously submitted) A computer program for effecting a targeted auction, comprising:

(a) software for electronically receiving data including confidential information regarding securities market participants;

(b) software for electronically storing said received data regarding securities market participants;

(c) software for electronically receiving information including a first order from a first securities market participant's computer;

(d) software for electronically storing said information received from said first securities market participant's computer;

(e) software for producing a targeted dissemination list of securities market participants based on said stored data regarding securities market participants and said information received from said first securities market participant's computer;

- (f) software for electronically transmitting to the securities market participants on said targeted dissemination list data based on said information received from said first securities market participant's computer;
- (g) software for electronically receiving subsequent orders from securities market participants in response to said transmitted data;
- (h) software for conducting an electronic auction among orders including said orders received in response to said transmitted data; and
- (i) software for electronically transmitting the status of orders to the respective securities market participants who initiated them.

39. (Previously submitted) The program of claim 38 wherein said information from said first securities market participant's computer includes auction parameters.

40. (Previously submitted) The program of claim 38 wherein said information received from said first securities market participant's computer includes specific dissemination parameters.

41. (Original) The program of claim 40 wherein said specific dissemination parameters include certified trading interest requirements.

42. (Previously submitted) The program of claim 38 wherein said confidential information regarding securities market participants includes trading interests.

43. (Original) The program of claim 42 wherein said trading interests are certified trading interests.

44. (Previously submitted) The program of claim 38 wherein said confidential information regarding securities market participants includes information regarding investment holdings.

45. (Original) The program of claim 38 wherein rules governing said electronic auction grant to said first order execution priority over said subsequent orders.

46. (Original) The program of claim 38 wherein rules governing said electronic auction prevent the matching of said subsequent orders and an order other than said first order until said first order is canceled or filled.

47. (Previously submitted) A method of evaluating a securities market participant's trading activities, comprising the steps of:

- (a) electronically receiving data regarding a first securities market participant, wherein said data comprises certified trading activity information;
- (b) electronically storing said received data regarding said first securities market participant;
- (c) producing a measure of said first securities market participant's trading activity with respect to a standard;
- (d) electronically storing said measure;
- (e) electronically receiving a request from said first securities market participant to have a report transmitted to a second securities market participant, wherein said report comprises said measure;
- (f) electronically storing said received request; and
- (g) electronically transmitting said requested report to said second securities market participant.

48. (Previously submitted) The method of claim 47 wherein said standard comprises non-certified trading information disseminated by said securities market participant.

49. (Previously submitted) The method of claim 47 wherein said standard comprises trading restraints set by said securities market participant.

50. (Original) The method of claim 47 wherein said standard comprises system-defined inappropriate trading behavior.

51. (Previously submitted) A computer program for evaluating a securities market participant's trading activities, comprising:

- (a) software for electronically receiving data regarding a first securities market participant, wherein said data comprises certified trading activity information;
- (b) software for electronically storing said received data regarding said first securities market participant;
- (c) software for producing a measure of said first securities market participant's trading activity with respect to a standard;
- (d) software for electronically storing said measure;

(e) software for electronically receiving a request from said first securities market participant to have a report transmitted to a second securities market participant, wherein said report comprises said measure;

(f) software for electronically storing said received request; and

(g) software for electronically transmitting said requested report to said second securities market participant.

52. (Previously submitted) The program of claim 51 wherein said standard comprises non-certified trading information disseminated by said securities market participant.

53. (Previously submitted) The program of claim 51 wherein said standard comprises trading restraints set by said securities market participant.

54. (Original) The program of claim 51 wherein said standard comprises system-defined inappropriate trading behavior.

55. (Previously submitted) A method of managing securities market information, comprising the steps of:

(1) enabling securities market participants to target dissemination of trading interests to only those other securities market participants likely to have a significant contra-interest;

(2) enabling securities market participants to ensure that other securities market participants' disseminated trading interests are validated as legitimate; and

(3) enabling auctions among trading interests targeted and validated as in steps (1) and (2).

56. (Previously submitted) The method of claim 1, wherein said confidential information regarding securities market participants comprises information regarding positions held in securities, securities trades executed, and active securities orders.

57. (Previously submitted) The method of claim 1, wherein said stored information regarding securities market participants comprises, for each of one or more of said securities market participants, parameters delineating trading interest information desired by that participant.

58. (Previously submitted) The method of claim 1, wherein said information received from a first securities market participant's computer comprises an initiating interest.
59. (Previously submitted) The method of claim 58, wherein said initiating interest is a live executable order to buy or sell a security.
60. (Previously submitted) The method of claim 1, wherein said information received from a first securities market participant's computer comprises confidential information regarding said first securities market participant.
61. (Previously submitted) The method of claim 60, wherein said confidential information is provided with the understanding that said information will not be provided to third parties.
62. (Previously submitted) The method of claim 60, wherein said confidential information is provided with the understanding that said first securities market participant will be provided with confidential trading interests of other securities market participants.
63. (Withdrawn) A system for managing securities market participant information, comprising:
a CTI manager in communication with a computer network;
a CTI user database in communication with said CTI manager; and
one or more external data sources.
64. (Withdrawn) A system as in claim 63, further comprising an auction server in communication with said CTI manager.
65. (Withdrawn) A system as in claim 63, wherein said CTI manager is operative to communicate with said one or more external data sources in real time.
66. (Withdrawn) A system as in claim 63, wherein said CTI user database is operative to receive and store information from said external data sources.
67. (Withdrawn) A system as in claim 63, wherein said CTI user database is configured to store user data comprising security and contact information.
68. (Withdrawn) A system as in claim 63, wherein said CTI user database is configured to store user data comprising CTI notification parameters.

69. (Withdrawn) A system as in claim 63, wherein said CTI user database is configured to store user data comprising, for at least one user, a user activity history.
70. (Withdrawn) A system as in claim 69, wherein said user activity history comprises auctions initiated and the outcome of each auction initiated.
71. (Withdrawn) A system as in claim 69, wherein said user activity history comprises CTI notifications received and securities orders placed in response.
72. (Withdrawn) A system as in claim 64, wherein said auction server is operative to manage a process of accumulating securities market participant contra orders and executing a matching auction.
